What Parents Need To Know

Code2College is helping to shape the next generation of STEM (Science, Technology, Engineering, and Mathematics) superstars by providing access, opportunities, and education to students from underrepresented backgrounds in tech. Students gain skills that will prepare them for college and beyond.

What Our Students Accomplished Last Year

15,000 hours of coding education
10,000 hours of professional skills development
Over \$200K wages earned in the Summer of 2019

Learn From The Pros

Bi-weekly, after-school computer programming classes (HTML, CSS, Javascript, Python) are taught by tech professionals from companies like Cirrus Logic, General Motors, and Silicon Labs.

Gain Real-World Experience

Paid employment opportunities at Fortune 500 and startup tech companies are available. Students can earn up to \$5,000 during the summer.

Find Guidance

Receive mentorship and support from professionals in cutting-edge industries including Software Development, Financial Services and Internet Services.

Go To College

Scholarship opportunities are available for students who remain active in the Code2College community as participants, mentors and/or alumni.

Visit Cool Places

Attend monthly professional skills workshops at leading Tech corporate offices (including Facebook, Google and VRBO).*

Virtual Events

Join us online for our virtual events including: online professional development workshops from tech professionals, Web Entrepreneurship Essentials classes and more!

Monthly workshops are part of our regular programming but has been put on hold until further notice due to COVID-related safety measures.
